

SHUBHAM PRABHAKAR PATIL

Python Backend Developer | Full-Stack Engineer | Fintech & API Systems

shubham.patil.work06@gmail.com · +91 87888 04767 · [Linkedin](#) · [Portfolio](#) · Hyderabad, India

PROFESSIONAL SUMMARY

Backend-focused software developer with production experience architecting high-throughput trading platforms, real-time WebSocket systems, and scalable REST APIs using Python (Django, FastAPI, Flask). Built and deployed algostraddle.com — a live algorithmic trading platform handling 1,000+ concurrent requests with sub-second order execution integrated across Zerodha Kite, Flattrade, and Delta Exchange. Skilled in multi-broker API integration, automated PnL pipelines, backtesting engines, and ML-driven product development. Passionate about fintech infrastructure and data-intensive full-stack systems.

PROFESSIONAL EXPERIENCE

Python Django Developer · A Plus Topper

June 2025 – Present | Hyderabad, India

- Architected and deployed algostraddle.com — a full-featured algorithmic trading platform with live/historical charting and real-time market data, integrating Zerodha Kite, Flattrade, and Delta Exchange broker APIs end-to-end.
- Engineered a high-performance Webhook Execution Engine translating TradingView strategy alerts into sub-second broker order placements, minimising slippage during volatile market conditions.
- Designed a horizontally scalable backend sustaining 1,000+ concurrent user sessions with zero downtime, ensuring platform reliability during high-frequency trading windows.
- Built real-time Live Chart dashboards and Historical Data Analytics modules, enabling traders to visualise positions, validate strategies, and analyse backtested performance with confidence.
- Developed a comprehensive backend ecosystem for automated strategy execution, dynamic real-time PnL reporting, and a fully integrated backtesting engine with configurable parameters.
- Optimised API middleware for high-frequency data polling and WebSocket stream management — reducing latency, increasing throughput, and significantly improving overall trade execution reliability.

PROJECTS

ChopChop — Full-Stack Food Delivery Platform | ReactJS, Django, PostgreSQL, Tailwind CSS, Framer Motion, JWT, Razorpay

- Engineered a production-ready food delivery platform with OTP + JWT authentication, real-time order tracking, cart management, and Razorpay payment gateway integration with webhook-based order confirmation.
- Designed and optimised REST APIs for the full checkout and order lifecycle; backend query optimisation and caching reduced average API response time by ~35%, improving UX under concurrent load.
- Delivered a responsive, animated UI using Tailwind CSS and Framer Motion — smooth page transitions and micro-interactions significantly improved perceived performance and user engagement.

MandiMind — AI-Powered Agricultural Price Intelligence Platform | Python, LightGBM, LSTM, Django, PostgreSQL, Programmatic SEO

- Designing an AI-driven mandi price aggregation platform for Indian farmers, FPOs, and commodity traders — pulling and normalising government AgMarkNet data across thousands of mandis and crop varieties.
- Building a dual-model ML price prediction engine using a LightGBM + LSTM ensemble for short-term forecasting and seasonal trend analysis, enabling proactive sell/hold decisions for farmers.
- Architecting programmatic SEO at scale to capture high-volume 'mandi bhav' organic search traffic — positioning MandiMind as India's definitive agricultural price intelligence platform.

TECHNICAL SKILLS

Languages:	Python, JavaScript, Java
Frameworks:	Django, FastAPI, Flask, ReactJS, REST API Design, WebSocket
ML & Data:	TensorFlow, Scikit-learn, LightGBM, LSTM, Pandas, NumPy
Databases:	PostgreSQL, MySQL
DevOps & Cloud:	AWS, Docker, Git, GitHub, DigitalOcean, Netlify, Render, Linux Server, CI/CD
Testing & QA:	PyTest, Postman, Selenium, Unit Testing
Practices:	Agile, High-Frequency Data Polling, Programmatic SEO, Backtesting Systems

EDUCATION

M.Sc. in Computer Science · Vishwakarma College of Arts, Commerce & Science, Pune

2023 – 2025 | CGPA: 8.73

B.Sc. in Computer Science · Shivaji University, Kolhapur

2020 – 2023 | CGPA: 9.34

CERTIFICATIONS

- Python for Everybody — Coursera (2024) · Full Stack Web Development — freeCodeCamp (2024)
